BSEACD Concerns

Construction Concerns

- **Excavation Impacting Karst Features**
  - Has KM estimated the number of Karst Features – voids and caves?
  - What are their construction methods to eliminate potential impacts?
  - Will KM develop a void mitigation plan?

- **Oversight to Pipeline Design and Construction**
  - Will they have a Karst expert?
  - Will they notify the Districts?

- **Pipeline Specifications**
  - Thickness, double-walled, corrosion protection?
BSEACD Concerns

Operations Concerns

- Potential for Liquids in Highly Permeable Rock
  - What liquids might be in the pipeline and how much could be released if a leak or spill occurs?

- Connectivity between the Aquifers
  - What could be the impacts to the Barton Springs and Austin Blind Salamanders?

- Pipeline Management Plan
  - Will herbicides be used for vegetation control?
  - How will they inspect the pipeline and how often?
  - How will they test the pipeline and how often?
