5-2 Implement a drought management program that step-wise curtails freshwater Edwards Aquifer use to at least 50% by volume of 2014 authorized aggregate monthly use during Extreme Drought, and that designs/uses other programs that provide an incentive for additional curtailments where possible. For all other aquifers, implement a drought management program that requires mandatory monthly pumpage curtailments during District-declared drought stages. During District-declared drought, enforce compliance with drought management rules to achieve overall monthly pumpage curtailments within 10% of the aggregate curtailment goal of the prevailing drought stage. A monthly drought compliance report for all individual permittees will be provided to the Board during District-declared drought, and a summary will be included in the annual report.

5-3 Inform and educate permittees and other well owners about the significance of declared drought stages and the severity of drought, and encourage practices and behaviors that reduce water use by a stage-appropriate amount.

A. During District-declared drought, publicize declared drought stages and associated demand reduction targets in monthly eNews bulletins and continuously on the District website.

B. A summary of drought and water conservation related newsletter articles, press releases, and drought updates sent to Press, Permittees, Well Owners and eNews subscribers will be provided in the annual report.

5-4 Assist and, where feasible, incentivize individual freshwater Edwards Aquifer historic-production permittees in developing drought planning strategies to comply with drought rules, including:

1. Pumping curtailments by drought stage to at least 50% of the 2014 authorized use during Extreme Drought.
2. "Right-sizing" authorized use over the long term to reconcile actual water demands and permitted levels, and as necessary and with appropriate conditions, the source substitution with alternative supplies.

A. Require an updated UCP/UDCP from Permittees within one year of each five-year Management Plan Adoption.

B. A summary of any activity related to permit right sizing or source substitution with alternative supplies that may reduce demand on the freshwater Edwards Aquifer will be provided in the annual report.

5-5 Implement a Conservation Permit that is held by the District and accumulates and preserves withdrawals from the freshwater Edwards Aquifer that were previously authorized with historic-use status and that is retired or otherwise additionally curtailed during severe drought, for use as ecological flow at Barton Springs during Extreme Drought and thereby increase springflow for a given set of hydrologic conditions.

A summary of the volume of aggregate groundwater withdrawals permitted and actually produced from permitted wells for each Management Zone and permit type including the volume reserved in the Freshwater Edwards Conservation Permit for ecological flows will be provided in the annual report.

| 8-1       | Freshwater Edwards Aquifer All-Conditions DFC: Adopt rules that restrict, to the greatest extent practicable, the total amount of groundwater authorized to be withdrawn annually from the Aquifer to an amount that will not substantially accelerate the onset of drought conditions in the Aquifer; this is established as a running seven-year average springflow at Barton Springs of no less than 49.7 cfs (1.41 m³/s) during average recharge conditions. | A. A summary of the volume of aggregate groundwater withdrawals permitted and actually produced from permitted wells for each Management Zone and permit type will be provided in the annual report.  
B. Upon ITP issuance, the HCP annual report documenting the District’s activities and compliance with ITP permit requirements will be incorporated into the annual report by reference.  
C. Upon ITP issuance, compile a summary of aquifer data including: 1) the frequency and duration of District-declared drought, 2) levels of the Aquifer as measured by springflow and indicator wells (including temporal and spatial variation), and 3) total annual and daily discharge from Barton Springs will be provided in the annual report. | 8-1 | PS 4-5 |
| 8-2       | Freshwater Edwards Aquifer Extreme Drought DFC: Adopt rules that restrict, to the greatest extent practicable and as legally possible, the total amount of groundwater withdrawn monthly from the Aquifer during Extreme Drought conditions in order to minimize take and avoid jeopardy of the Covered Species as a result of the Covered Activities, as established by the best science available. This is established as a limitation on actual withdrawals from the Aquifer to a total of no more than 5.2 cfs (0.15 m³/s) on an average annual (curtailed) basis during Extreme Drought, which will produce a minimum springflow of not less than 5.5 cfs (0.18 m³/s) during a recurrence of the drought of record (DDR). | A. A summary of the volume of aggregate groundwater withdrawals permitted and actually produced from permitted wells for each Management Zone and permit type will be provided in the annual report.  
B. Upon ITP issuance, the HCP annual report documenting the District’s activities and compliance with ITP permit requirements will be incorporated into the annual report by reference.  
C. Upon ITP issuance, compile a summary of aquifer data including: 1) the frequency and duration of District-declared drought, 2) levels of the Aquifer as measured by springflow and indicator wells (including temporal and spatial variations), and 3) total annual and daily discharge from Barton Springs will be provided in the annual report. | 8-2 | Objective 5, PS 4-2, PS 4-5 |
| 8-8       | Implement appropriate rules and measures to ensure compliance with District-adopted DFCs for each relevant aquifer or aquifer subdivision in the District. | Develop and implement a cost-effective method for evaluating and demonstrating compliance with the DFCs of the relevant aquifers in the District, in collaboration with other GCDs in the GMAs. Prior to method implementation, provide a summary of activities related to method development. Once developed, provide a summary of data for each District-adopted DFC for each relevant aquifer indicating aquifer conditions relative to the DFC and provide in the annual report. | N/A |

CAPITAL AREA COUNCIL OF GOVERNMENTS

ARTICLE I - CREATION AND PURPOSE

Section 1.1 - Preamble

(a) We, the representatives of local governments in State Planning Region 12, join together in a voluntary organization, to be known as the Capital Area Council of Governments, for the purpose of meeting at regular intervals to discuss and study community challenges of mutual interest and concern, and to develop plans, policies, and recommendations for action for approval and implementation by member local governments and other levels of government within the Region.

(b) We recognize that our individual and common destinies rest with the interdependent actions of the local governments located within the Region.

(c) The Capital Area Council of Governments is a voluntary organization of local governments through which its members seek, by mutual agreement and closer cooperation, solutions to mutual problems for their mutual benefit.

(d) The Council’s goal is to combine the total resources of its members for regional planning beyond the capabilities of the individual members.

Section 1.2 – Creation

The Capital Area Council of Governments was created June 26, 1970, pursuant to the Regional Planning Act of 1965, as amended, Chapter 391 of the Texas Local Government Code. The Council’s geographic boundaries are coextensive with State Planning Region 12, which comprises the counties of Bastrop, Blanco, Burnet, Caldwell, Fayette, Hays, Lee, Llano, Travis, and Williamson. The name of the council was changed from Capital Area Planning Council to Capital Area Council of Governments effective August 11, 2004.

Section 1.3 – Purpose

(a) The general purpose of the Council is to encourage and facilitate local governments in the Region to cooperate with one another, with other levels of government, and with the private sector to plan for the future development of the Region and thereby improve the health, safety, and general welfare of their citizens.

(b) The specific purposes of the Council are:

1. to make studies and plans to guide the unified, far-reaching development of the Region and assist participating local governments in preparing and implementing plans that are consistent with the Council’s general purpose;
2. to coordinate development in the Region and thereby eliminate duplication and promote economy and efficiency;
3. to serve as a forum to identify, focus on, discuss, and study regional challenges and opportunities;
(4) to serve as a vehicle for the collection and exchange of information about the Region and to provide for effective communication and coordination among member governments, other levels of government, and the private sector;
(5) to encourage, develop, and review policies, plans, and priorities for Regional growth and development;
(6) to furnish general and technical aid to member governments;
(7) to facilitate agreement and cooperative action among member governments to carry out specific projects;
(8) to maintain liaison with member governments, other levels of government, and the private sector, and to serve as a Regional spokesman for local governmental interests;
(9) to review, coordinate, and expedite federal, state, and local governmental programs that have Regional implications; and
(10) to develop and carry out plans and programs as directed by the Council.
