NOTICE OF OPEN MEETING

Notice is given that a Regular Meeting and Public Hearing of the Board of Directors of the Barton Springs/Edwards Aquifer Conservation District will be held at the District office, located at 1124 Regal Row, Austin, Texas, on Thursday, September 27, 2018, commencing at 6:00 p.m. for the following purposes, which may be taken in any order at the discretion of the Board.

Note: The Board of Directors of the Barton Springs/Edwards Aquifer Conservation District reserves the right to meet in Executive Session at any time during the course of this meeting to discuss any of the matters listed on this agenda, as authorized by the Texas Government Code Sections §551.071 (Consultation with Attorney), 551.072 (Deliberations about Real Property), 551.073 (Deliberations about Gifts and Donations), 551.074 (Personnel Matters), 551.076 (Deliberations about Security Devices), 551.087 (Economic Development), 418.183 (Homeland Security). No final action or decision will be made in Executive Session.

- 1. Call to Order.
- 2. Citizen Communications (Public Comments of a General Nature).
- 3. Routine Business
 - a. Consent Agenda. (Note: These items may be considered and approved as one motion. Directors or citizens may request any consent item be removed from the consent agenda, for consideration and possible approval as a separate item of Regular Business on this agenda.)
 - 1. Approval of Financial Reports under the Public Funds Investment Act, Directors' Compensation Claims, and Specified Expenditures greater than \$5,000. NBU
 - 2. Approval of minutes of the Board's September 13, 2018, Regular Meeting and Public Hearing. Not for public review at this time
 - Approval of issuing the earned Conservation Credits to permittees for FY 2018.
 Pg. 8
 - b. General Manager's Report. (Note: Topics discussed in the General Manager's Report are intended for general administrative and operational information-transfer purposes. The Directors will not take any action unless the topic is specifically listed elsewhere in this agenda for consideration.)
 - 1. Standing Topics.
 - i. Personnel matters
 - ii. Upcoming public events of possible interest
 - iii. Aquifer conditions and status of drought indicators
 - 2. Special Topics. (Note: Individual topics listed below may be discussed by the Board in this meeting, but no action will be taken unless a topic is specifically posted elsewhere in this agenda as an item for possible action. A Director may request an individual topic that is presented only under this agenda item be placed on the posted agenda of some future meeting for Board discussion and possible action.)
 - i. Update on certain projects and activities of individual teams.

- ii. Update on the Barton Springs/Edwards Aquifer Habitat Conservation Plan Incidental Take Permit Number TE10607C- 0. Pg. 20
- iii. Update on activities related to the Travis County ILA.
- iv. Update on Board committee activity.
- v. Update on various development activity over aquifer recharge and contributing zones.

4. Public Hearing.

The Board will hold a public hearing on two well drilling applications for the Gragg Tract LP. for wells proposed to be discretely completed in either the Middle Trinity or Lower Trinity aquifers, located in Hays County on a 224.16 acre tract at Old Bliss Spillar Rd (30.131450°, -97.868006° and 30.130811°, 97.861608°), and planned to be part of a public water supply well field used to support a future mixed-use development along the future SH 45 corridor which is not within an existing CCN. Note: A separate Production Permit Application will be required to operate and produce from these wells in the future.

5. Discussion and Possible Action.

- a. Discussion and possible action to approve the two well drilling applications for the Gragg Tract LP. for wells proposed to be discretely completed in either the Middle Trinity or Lower Trinity aquifers, located in Hays County on a 224.16 acre tract at Old Bliss Spillar Rd (30.131450°, -97.868006° and 30.130811°, 97.861608°), and planned to be part of a public water supply well field used to support a future mixed-use development along the future SH 45 corridor which is not within an existing CCN. Note: A separate Production Permit Application will be required to operate and produce from these wells in the future. Pg. 29
- b. Discussion and possible action related to the approval of the amended and restated water pipeline easement from the District to the Alliance Regional Water Authority formerly the Hays Caldwell Public Utility Agency. Pg. 45
- c. Discussion and possible action related to the performance and compliance of District permittees with their User Drought Contingency Plan curtailments. **Pg. 52**
- d. Discussion related to assessment of progress made towards achievement of the District Goals set for FY 2018 and identification of possible District goals for FY 2019. **Pg. 60**
- e. Discussion and possible action related to scheduling of hearing and procedural matters relating to Needmore Water LLC permit application. **NBU**

6. Adjournment.

Please note: This agenda and available related documentation, if any, have been posted on the District website, www.bseacd.org. If you have a special interest in a particular item on this agenda and would like any additional documentation that may be developed for Board consideration, please let staff know at least 24 hours in advance of the Board Meeting so that we can have those copies made for you.

The Barton Springs/Edwards Aquifer Conservation District is committed to compliance with the Americans with Disabilities Act (ADA). Reasonable accommodations and equal opportunity for effective communications will be provided upon request. Please contact the District office at 512-282-8441 at least 24 hours in advance if accommodation is needed.

Item 1 Call to Order

Item 2 Citizen Communications

Item 3

Routine Business

a. Consent Agenda

(Note: These items may be considered and approved as one motion. Directors or citizens may request any consent item be removed from the consent agenda, for consideration and possible approval as a separate item of Regular Business on this agenda.)

- 1. Approval of Financial Reports under the Public Funds Investment Act, Directors' Compensation Claims, and Specified Expenditures greater than \$5,000.
- 2. Approval of minutes of the Board's September 13, 2018, Regular Meeting and Public Hearing.
- 3. Approval of issuing the earned Conservation Credits to permittees for FY 2018.

October 1, 2018

Permittee Name 1100 Street Name Austin, TX 78723

Dear Mr./Mrs. Permittee Name:

Your continuing commitment to reduce the use of water from the Edwards Aquifer is sincerely appreciated. Those efforts in the 2018 fiscal year have earned you a conservation credit in the amount \$1,000. Congratulations! Your leadership and example in water conservation demonstrate to other users the importance of finding ways to protect the Aquifer while it is utilized as a critically important water resource.

Want to put your conservation credits to work educating local area youth? You could choose to donate all or a portion of your conservation credits to the District's Scholarship program. Each year in collaboration with our participating permittees, we offer one \$2,500 college scholarship and several camp scholarships to the Edwards Aquifer Research and Data Center's Aquatic Sciences Adventure Camp in San Marcos. Both scholarships encourage students to expand their groundwater knowledge through research or through hands-on aquifer science and monitoring, aquatic biology, water chemistry and caving.

With help from permittee donations, last year we were able to award a \$2,500 college scholarship and send 18 elementary and middle school students to summer camp! A \$350 donation will send one student to a 5-day camp or a \$700 donation will provide a week-long overnight camp opportunity for one student. More information can be found at http://www.eardc.txstate.edu/education-center/camp.html. Feel free to contact Robin Gary, Public Information and Education Coordinator, at the District with any questions.

If you would like to donate your conservation credit or a portion of your credit, simply fill out the enclosed authorization form and mail, email or fax it to the District office by October 26, 2018.

Otherwise your conservation credit will be reflected on your following water usage fee statement. If you have questions about your conservation credit, please contact Shannon DeLong at the District office. And if you have questions about the District and its programs, please see the wealth of information on our website at www.bseacd.org, or let me know.

Thanks for your conservation efforts in the past year and your commitment to continuing them in the upcoming year!

Sincerely,

Alicia Reinmund-Martinez General Manager

2018 Scholarship Winners

Thanks to donations from permittees, board members and contributions from the District, we were able to send 18 students to Aquatic Science Adventure Camp in 2018. We hope you consider donating your conservation credits to support this wonderful program in 2019.

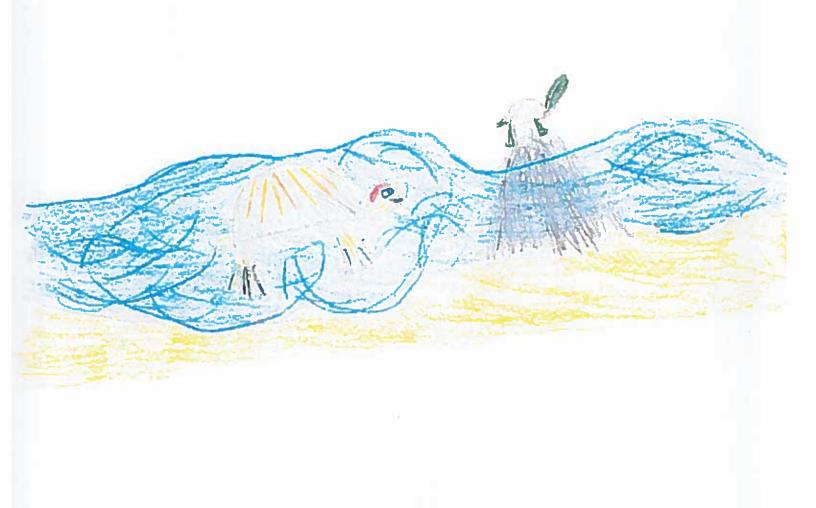

2018 winners were from a diverse set of schools in Austin, Dripping Springs, San Marcos, Buda, and Wimberley.

We're proud to announce the 2018 camp scholarship winners:

- Lily Butler, Carpenter Hill Elementary
- Lucas Goodman, Mjolnir Academy
- Forest Goodman, Mjolnir Academy
- Owen Mielke, Rawson Saunders School
- Julia Rennels, Danforth Jr. High School
- Riley Fall, Dahlstrom Middle School
- Quinn Sprute-Saunders, Jacobs's Well Elementary
- Caleb Lowary, Mills Elementary
- Taylor Holzman, Dahlstrom Middle School
- Slade Holzman, Carpenter Hill Elementary
- Charlotte Hill, Gorzycki Middle School
- Genevieve Hill, Gorzycki Middle School
- Natalee Scholl, Sycamore Springs Middle School
- Stella Seligson, O. Henry Middle School
- Sophia Thurman, Buda Elementary
- Serenity Rincon, Dahlstrom Middle School
- Piper Camarillo, Barton Hills Elementary
- Elianna Agobe, San Marcos Adventist Academy

The District would like to thank Creedmoor-Maha WSC, Goforth SUD, and Texas Lehigh Cement Company for donating all or a portion of their 2017 Conservation Credits to the scholarship fund. The scholarship program would not be a success without these generous donations! Thank you!!!

I am Lily Butler and I would really enjoy going to the Aquatic Science Camp. I would like to go because I enjoy getting wet and I love exploring. I am also in heaven when I work with nature. I am told that I am a good learner and Aquatic Science is something that I love to learn about. I am excited about the opportunity to do some cave exploration.

Real Enr. Quinn

Real Enr. Quinn

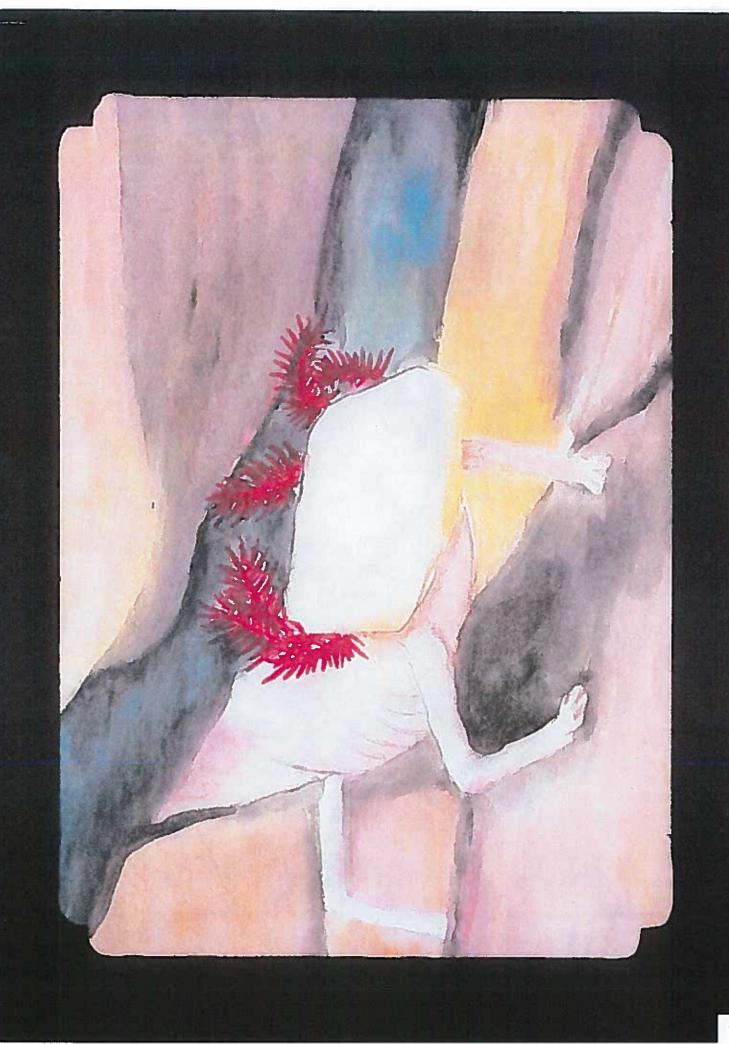

Attending the Aquatic Sciences

Advent & cam paid be amazing because

I love water and science. The opportunity

to experience both at a college compus

Would be awesome! just visited the Meadows Center during spring break and had the chance to search for bugs samples taken from Spring Lake. It was tough to catch the danself y nymph and stone flx nymp. I found, but I enjoyed it. My favoriting part of the glass bottem beat tour was seeing the under water geysers and the scuba divers learning to garden under w ter. It's an incredible place and I can't wait to go back! The activities I most look forward to at Camp are scuba diving, the invertebrate lab and the chemistry Lab. Spending time at University Camp on the rope course and natural water slide would be great I have never gone river natting or caving but I'm excited sounds like the pest adventur Real

Why I would love to attend the Aquatic Science Camp

Edwards Aquifer is one of the most intriguing natural water sources to me. While my school does talk about the way the aquifer works it really hasn't mentioned the wildlife life of Edwards Aquifer, nor have they mentioned how it was formed. I have always been exceedingly curious and hard-working, but I haven't the chance to further understand the aquifer. So in my mind, I see this camp as an opportunity to get the chance/ability to understand this with a deeper meaning. For instance, how does our careless act of littering affect the lives the aquifer supports? Or how does global warming affect the temperature of the aquifer. From what I know most formations of water are fairly cool, but is that the same with Edwards Aquifer? I also want to form a personal opinion and perhaps if I can be well educated maybe I can conclude an informed opinion. What I do know is that Edwards Aquifer is an entire ecosystem on its self, supporting both abiotic and biotic, that brings me to my last reason I would like to attend the Aquatic Science Adventure Camp.

Thank you for reading this

-Charlotte Hill

by Caleb Lowar Want to go to Texas State Camp sounds Aquatic AMAZINGITT has so many cool water Science activities and ofher fun thing. I have never been to an evernish camp and I would really to be in one this summer. the Water activities are amazing/Water ratting is awesome, you get to be splashed with water while going rafting. There is also scuba diving which is one I have never done and I really want to do. There are so many other water sports too t would be so and I would be very exited be in the wonderful venture Campola to learn about nature and science while having fun Even if I don't yeall gree hosting a great camp.

Item 3

Routine Business

b. General Manager's Report. (Note: Topics discussed in the General Manager's Report are intended for general administrative and operational information-transfer purposes. The Directors will not take any action unless the topic is specifically listed elsewhere in this agenda.)

1. Standing Topics.

- i. Personnel matters and utilization
- ii. Upcoming public events of possible interest
- iii. Aquifer conditions and status of drought indicators
- 2. Special Topics. (Note: Individual topics listed below may be discussed by the Board in this meeting, but no action will be taken unless a topic is specifically posted elsewhere in this agenda as an item for possible action. A Director may request an individual topic that is presented only under this agenda item be placed on the posted agenda of some future meeting for Board discussion and possible action.)
 - i. Update on certain projects and activities of individual teams.
 - ii. Update on the Barton Springs/Edwards Aquifer Habitat Conservation Plan Incidental Take Permit Number TE10607C-0.
 - iii. Update on activities related to the Travis County ILA.
 - iv. Update on Board committee activity.
 - v. Update on various development activity over aquifer recharge and contributing zones.
 - vi. Update on the procedural matters relating to the Needmore Water LLC permit application.

Email address areinmund@bseacd.org

Authority: Statutes and Regulations: 16 USC 1539(a); 50 CFR 17.22, 17.32, 50 CFR 13.

Location where authorized activity may be conducted:

Within the Barton Springs segment of the Edwards Aquifer under the Barton Springs/Edwards Aquifer Conservation District's (BSEACD) jurisdictional authority.

Reporting requirements:

Annual REPORT DUE: February 28 during permit term See permit terms and conditions for specific reporting requirements.

Conditions and Authorizations:

- A. General conditions set out in subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above in Authority, are hereby made a part of this permit. All activities authorized herein must be carried out in accordance with and for the purposes described in the application submitted. Continued validity, or renewal, of this permit is subject to complete and timely compliance with all applicable conditions, including filing all required information and reports.
- B. Valid for use by permittees named above. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, or other Federal law.
- C. Acceptance of the permit serves as evidence that the Permittee understands and agrees to abide by the terms and conditions of this permit and all applicable sections of 50 CFR Parts 13 and 17 pertinent to issued permits. Terms and conditions of the permit are inclusive. Any activity not specifically permitted is prohibited. Violations of permit terms and conditions could result in the permit being suspended or revoked. Violations of the permit terms and conditions that contribute to a violation of the Endangered Species Act (ESA) could also subject you to criminal or civil penalties.
- D. The person listed above must counter-sign the permit to acknowledge receipt and signify agreement to fully abide by and implement this permit. You must return an original signature copy to the Regional Office listed below in condition M.

Permittee Signature: Blugu Stansbury Date: 9/20/2018

Effective: 9/7/2018

Expires: 9/30/2038

E. Compliance

The authorization granted by this permit will be subject to full and complete compliance with, and implementation of, the Barton Springs/Edwards Aquifer Conservation District HCP and all specific conditions contained in this permit. The permit terms and conditions shall supersede and take precedence over any inconsistent provisions in the HCP or other program documents.

F. Definitions

Terms used in this Permit and specifically defined in the ESA or in regulations adopted by the Service under the ESA have the same meaning as in the ESA and those implementing regulations, unless this Permit expressly provides otherwise.

G. Covered Species

The following is a list of the species covered under this Permit:

Common Name	Scientific Name	Federal Listing Status
Barton Springs salamander	Eurycea sosorum	E
Austin blind salamander	Eurycea waterlooensis	E

H. Incidental Take Authorized

Since there is no way to count the number of individuals of either species taken as a result of Covered Activities, BSEACD uses drought occurrences as a surrogate for the total number of individuals injured or killed. Salamanders exposed to different levels of drought conditions may be harmed once or multiple times, and eventually killed as a result of Covered Activities.

In the absence of the ability to document take of the Covered Species in the wild during drought, BSEACD used springflows and DO as metrics for measuring effects during a worst-case drought scenario. The depth (how much springflow is reduced) of any particular drought condition affects how much of the salamander population is exposed to these conditions, and the duration (the number of months that springflow is reduced) of the drought condition affects how long the population is exposed to the degraded environmental conditions. Since drought conditions cannot be predicted with certainty for the 20 year permit term, the following calculations are based on the period of record (1913-2013) and a series of reference droughts.

Drought/Springflow Scenarios	No. Months below 30 cfs (Per Modeled Hydrographs)	BSS Take/Month	ABS Take/Month	Total Take (Incidents)
7-Year DOR	72	174	36.6	BSS=12,528 ABS=2,635.2
7-Year Hybrid Drought	44	174	36.6	BSS=7656 ABS=1,610.4
6 Years No Drought	0	0	0	0
Occasional Activities			-	BSS and ABS=15 each
Cumulative Total for ITP	116*		T 'LEE 'LEE	~20,200 BSS; ~4,260 ABS

If actions associated with implementation of the HCP are shown to result in incidental take of listed species not covered by this permit, those activities that are shown to cause take must cease immediately and any take that has occurred must be reported to the Austin ESFO at 512/490-0057 within 48 hours.

Barton Springs/Edwards Aquifer Habitat Conservation Plan ENDANGERED/THREATENED WILDLIFE Permit Number: TE10607C-0

> Effective: 9/7/2018 Expires: 9/30/2038

Covered Activities

BSEACD is a statutorily mandated groundwater conservation district (GCD) that issues permits to well owners/operators for their groundwater supply. Covered Activities include:

- 1. groundwater withdrawals from permitted non-exempt wells in the Barton Springs Segment of the Edwards Aquifer (Aquifer) that are authorized and regulated under the BSEACD's permitting program, and
- 2. activities necessary to manage potential habitat for the Covered Species within the permit area as described in the HCP.

J. **Conservation Program**

1. Minimization

The BSEACD shall implement the following minimization measures in accordance with the HCP. Each measure has a corresponding objective and one or more associated performance standards (metrics) set forth in the HCP. These standards will be reviewed and revised every five years to be responsive to all then-recognized needs. Revisions to these metrics will not require a permit amendment, unless the amount of incidental take is expected to increase. Chapters of the HCP where more details are located are provided:

- a) Provide the most efficient use of groundwater (6.2.1.1).
- Control and prevent waste of groundwater (6.2.1.2). b)
- c) Address conjunctive surface water management issues (6.2.1.3).
- d) Address natural resource management issues (6.2.1.4).
- Address drought conditions (6.2.1.5). e)
- Address demand reduction through conservation (6.2.1.6). f)
- Address supply through structural enhancement (6.2.1.7). g)
- Quantitatively address established desired future conditions (6.2.1.8). h)

2. Mitigation

The BSEACD will implement the following mitigation measures. Chapter 6.2.2.2 of the HCP provides the specific details of each measure.

- Commitment to support the operations of an existing refugium through in-kind, contracted a) support, or cash provisions or other appropriate means.
- Conduct a feasibility study of dissolved oxygen augmentation. If warranted, and with the cooperation of the City of Austin, the BSEACD will implement a pilot project at the outlets.
- Maintain and operate the Antioch Recharge Enhancement Facility for the permit term. c)
- Establish a new reserve fund for plugging abandoned wells to eliminate high-risk abandoned wells as potential conduits for contaminants from the surface or adjacent formations into the aquifer, with priority given to problematic wells close to the Barton Springs outlets and/or associated with water chemistry concerns under severe drought conditions.
- Provide leadership and technical assistance to other government entities, organizations, and individuals when prospective land-use and groundwater management activities in those

Barton Springs/Edwards Aquifer Habitat Conservation Plan ENDANGERED/THREATENED WILDLIFE Permit Number: TE10607C-0

> Effective: 9/7/2018 Expires: 9/30/2038

entities' purview will, in the BSEACD's assessment, significantly affect the quantity or quality of groundwater in the Aquifer.

3. Research

The BSEACD will support research to address uncertainties, such as the hydrologic performance of the Aquifer, especially during extreme low-flow conditions; the relationship between springflow and its DO concentrations, especially during extreme low-flow conditions; the ecological effects and physiological impacts of antagonistic contaminants in recharge water, and salamander behavior, both individually and as a population, under ecological stress (Chapter 6.2.2.1 of the HCP).

K. **Changed Circumstances**

Because of a number of uncertainties (described in HCP Chapter 7.2.1) surrounding the Covered Species and their habitat, BSEACD developed a method (described in HCP Chapter 7.1.2) to determine if a changed or unforeseen circumstance has occurred. The BSEACD will provide information about the circumstance to the Service. If the Service determines it is a changed circumstance, the BSEACD will implement the actions described (HCP Chapter 7.2.2) for that circumstance.

Monitoring L.

The BSEACD will implement the following monitoring activities. Chapters of the HCP are provided where each measure is detailed.

- 1. Monitor groundwater management actions (6.3.1).
 - 2. Monitor HCP effectiveness (6.3.2).
 - 3. Monitor HCP implementation (6.3.3)

Based on the results of the monitoring, the BSEACD will implement an adaptive management program (Chapter 6.4 of the HCP).

M. Reporting

An annual report will be submitted by February 28 of each year this permit and the BSEACD HCP is in effect to the Austin ESFO at the address below. The annual report will describe the previous fiscal year's (September 1 through August 31) activities and compliance with this permit and the HCP (as described in the BSEACD HCP). At the end of the ITP term, the permittee(s) must submit a final annual report summarizing full compliance with the permit and HCP.

U.S. Fish and Wildlife Service Austin Ecological Services Field Office 10711 Burnet Road, Suite 200 Austin, Texas 78758 Telephone 512/490-0057 Fax 512/490-0974

Barton Springs/Edwards Aquifer Habitat Conservation Plan ENDANGERED/THREATENED WILDLIFE Permit Number: TE10607C-0

Effective: 9/7/2018 Expi

Expires: 9/30/2038

A copy of the cover letter must be submitted to the Service's Regional Office, preferably by e-mail to FW2_HCP_Permits@fws.gov, or to the following address:

U.S. Fish and Wildlife Service, Region 2
Branch of Environmental Review
P.O. Box 1306, Room 6034
Albuquerque, New Mexico 87103
Telephone 505/248/6920
FW2 HCP Permits@fws.gov

The annual report will include:

- 1. Descriptions of the Covered Activities undertaken;
- 2. Reported groundwater withdrawals from permitted wells;
- 3. Reference well levels;
- 4. Springflow at Barton Springs;
- 5. Total Aquifer discharge, measured for permitted wells, estimated for exempt wells, gaged/measured for Barton Springs; and estimated for Cold & Deep Eddy Springs;
- 6. Drought-stage management reductions;
- 7. Estimated actual take, if any, for the annual reporting period, and total cumulative take for the ITP term:
- 8. Minimization measures and actions taken during the prior year;
- 9. Mitigation actions taken during the year and updates on any ongoing mitigation actions;
- 10. An evaluation of the effectiveness of the avoidance, minimization, and conservation measures;
- 11. Adaptive management activities undertaken during the year or indicated as prudent by outcomes of the conservation program;
- 12. Expenditures by BSEACD on implementation activities;
- 13. Any species-specific or aquifer research compiled or completed during the prior year:
- 14. Proposed activities for the next year:
- 15. Recommendations for improvement; and
- 16. Any other appropriate information documenting Permittee's compliance with the Permit.

GENERAL TERMS AND CONDITIONS

N. No Surprises Assurances

The covered species listed above are considered adequately addressed under the Barton Springs/Edwards Aquifer Conservation District HCP, and are therefore, covered by "No Surprises" assurances. If the Service demonstrates that unforeseen circumstances exist during the life of the permit and additional measures are deemed necessary to respond to those circumstances, the Service may require additional measures of the permittees where the HCP is being properly implemented, but only through coordination with the permittees and only if such measures are limited to modifications to the HCP's operating conservation program for the covered species, and maintain the original terms of the HCP to the maximum extent practicable.

Notwithstanding the foregoing, the Service will not require the commitment of additional land, water, or

Permit Number: TE10607C-0

Effective: 9/7/2018 Expires: 9/30/2038

financial compensation or additional restrictions on the use of land, water, or other natural resources beyond the level otherwise agreed upon for covered species without the consent of the permittee(s).

O. Transferring

The terms and conditions of this permit shall be binding on and inure to the benefit of the permittee(s), including their successors and assigns, as provided in 50 CFR 13.24 and 13.25. If this permit needs to be transferred due to a change in ownership the transfer will be accomplished in accordance with 50 CFR 13.25. Any change in the names, addresses or other administrative correction or alteration of the permit will be in accordance with 50 CFR 13.23. The covered activities proposed or in progress under the original permit may not be interrupted provided the conditions of the permit are being followed.

P. Amendments

This permit may be amended in accordance with the provisions of 50 CFR 13.23. The permittee(s) must provide a written statement of the reasons for the proposed amendment and an analysis of its environmental effects, including its effects on covered species. The activities proposed or in progress under this permit may not be interrupted, provided the required conditions of this permit are being followed. The Service may amend the permit at any time for just cause, and upon written finding of necessity.

If the covered activities and/or the extent of the impacts described in the agreement are altered during the life of the permit, such that there may be an increase in the anticipated take of covered species, permittee(s) are required to contact the Service and obtain authorization and/or amendment of this permit before commencing any activities that might result in take beyond that described in the agreement.

Q. Suspension and Revocation

Suspension: The Service may suspend this permit if the permittee(s) is/are not in compliance with the conditions of this permit, the agreement, or any applicable Federal laws and regulations. The procedures applicable to any suspension shall be in accordance with the Federal regulations in effect at the time of the suspension; provided however, that, at a minimum, the permittee shall be afforded the procedural rights set forth in 50 CFR 13.27 in existence on the effective date. The suspension shall remain in effect until the Service determines that the permittee(s) have corrected the deficiencies.

Revocation: The Service shall not revoke this permit for any reason except those listed in 50 CFR 13.28(a)(1)-(4), or unless the covered activities would be inconsistent with the criteria set forth in 16 U.S.C. § 1539(a)(2)(B)(iv) and this inconsistency has not been remedied. Notwithstanding the foregoing, this Permit will only be revoked if the Service, the Permittees, and other interested parties have not been successful in remedying any such inconsistency through other means.

R. Renewals

The permittee(s) may apply for the renewal of the permit prior to its expiration date in accordance with the provisions of 50 CFR § 13.22.

Page 7 of 7
Barton Springs/Edwards Aquifer Habitat Conservation Plan
ENDANGERED/THREATENED WILDLIFE
Permit Number: TE10607C-0

Effective: 9/7/2018 Expires: 9/30/2038

S. Disposition

Upon locating a dead, injured, or sick individual of the covered species, or any other endangered or threatened species, the Permittee is required to contact the Service's Law Enforcement Office in San Antonio, Texas, 210/681-8417 for care and disposition instructions. Extreme care should be taken in handling sick or injured individuals to ensure effective and proper treatment. Care should also be taken in handling dead specimens to preserve biological materials in the best possible state for analysis of cause of death. In conjunction with the care of sick or injured endangered/threatened species, or preservation of biological materials from a dead specimen, the Permittee and any contractor/subcontractor has the responsibility to ensure that evidence intrinsic to the specimen is not unnecessarily disturbed.

*** End of Permit Terms and Conditions for Permit # TE10607C-0 ***

Item 4

Public Hearing

The Board will hold a public hearing on two well drilling applications for the Gragg Tract LP. for wells proposed to be discretely completed in either the Middle Trinity or Lower Trinity aquifers, located in Hays County on a 224.16 acre tract at Old Bliss Spillar Rd (30.131450°, -97.868006° and 30.130811°, 97.861608°), and planned to be part of a public water supply well field used to support a future mixed-use development along the future SH 45 corridor which is not within an existing CCN. Note: A separate Production Permit Application will be required to operate and produce from these wells in the future.

Item 5

Board Discussions and Possible Actions

a. Discussion and possible action to approve the two well drilling applications for the Gragg Tract LP. for wells proposed to be discretely completed in either the Middle Trinity or Lower Trinity aquifers, located in Hays County on a 224.16 acre tract at Old Bliss Spillar Rd (30.131450°, -97.868006° and 30.130811°, 97.861608°), and planned to be part of a public water supply well field used to support a future mixed-use development along the future SH 45 corridor which is not within an existing CCN. Note: A separate Production Permit Application will be required to operate and produce from these wells in the future.

Application Summary and Staff Recommendations 9/27/18

DESCRIPTION OF APPLICATION

Applicant:

Gragg Tract, LP

Type of Application: Well Drilling Authorization for new wells in the Lower Trinity

Management Zone

Request:

Applicant requests to drill two (2) wells in the Lower Trinity Aquifer for the purposes of supporting a mixed use development, which may include public water supply and/or irrigation use. A separate Production Permit Application will be required in order to operate and produce from these

wells in the future.

REASON FOR REQUEST

Gragg Tract LP filed two (2) well drilling authorization applications on May 9, 2018 with the District for new nonexempt Lower Trinity wells. Prior to submitting these two applications, the applicant had submitted and received an approved well drilling authorization in fall of 2017 to drill Well #1 for the purposes of initially evaluating the production quality and yields of the Lower Trintiy aquifer. The two new wells (Well #2 and Well #3) are expected to be completed in the Lower Trinity with the slight possibility of one of the wells being discretely completed in the Middle Trinity rather than the Lower Trinity. The proposed wells are being drilled for the purpose of continuing evaluations of the viability of a Lower Trinity groundwater source to support a planned future mixed use development, which may include public water supply and/or irrigation use. Both the applicant and staff recognize that in order to adequately assess the groundwater production rates and representative water quality of a Lower Trinity well, the wells would need to be designed and completed as a permanent and standard well completions. If the applicant finds the groundwater production and quality to be adequate and desirable, the applicant may consider filing a future production permit application in which case they would have to support that request by completing a full-scale aguifer test and hydrogeological report.

WELL/RECEIVING AREA LOCATION

The proposed wells are located in Hays County on a 224.16 acre tract at Old Bliss Spillar Rd (30.131450°, -97.868006° and 30.131811°, -97.861608°). The wells are located on a property that is adjacent to the SH 45SW right of way corridor. Attachment A shows the location of the proposed new wells (Well #2, Well #3) and the location of the previously drilled (Well #1). The produced groundwater is proposed to be used primarily for a future 224.16 acre mixed use development that would include multi-family and single-family developments as well as retail and office space.

WELL DESIGN

The wells are expected to be completed in the Lower Trinity with the slight possibility of one of the wells being discretely completed in the Middle Trinity. The total well depth of the lower Trinity Wells will be will be approximately 1,600 -1,750 ft below ground surface and completed so that water is only produced from the Lower Trinity Sligo and Hosston Formations (Attachment B).

APPLICATION REVIEW

- Staff has reviewed the applications and has determined that the applications have satisfied all the requirements pursuant to the application checklist requirements in District Rule 3-1.4.A and that the required documentation and payment of fees have been satisfied.
- Staff has determined that the applicant has sufficiently addressed the criteria and considerations for Board action in accordance with District Rule 3-1.6(A).
- Staff has confirmed that the applicant filed proper notice and the required 20-day public comment period has expired in accordance with District Rule 3-1.4.B. (Attachment C).

STAFF RECOMMENDATIONS - 9/27/18

Staff recommends approval of the above-referenced well drilling authorization applications.

Gragg Tract LP, (1010 W. Martin Luther King Jr. Blvd, Austin, Texas 78701) filed two well drilling applications on May 9, 2018, with the Barton Springs/Edwards Aquifer Conservation District (District) for two new nonexempt wells. The wells are proposed to be discretely completed in either the Middle Trinity or Lower Trinity aguifers, and are planned to be part of a public supply well field used to support a future mixed use development along the future SH 45 corridor which is not within an existing CCN. A separate Production Permit Application will be required in order to operate and produce from these wells in the future. The proposed wells are located in Hays County on a 224.16 acre tract at Old Bliss Spillar Rd (30.131450?, -97.868006? and 30.130811?. 97.861608?). Publication of this notice begins a 20day public response period for which comments. written formal protests and requests for a public hearing will be accepted by the District. Parties interested in formally participating in a hearing on a contested application should refer to District Rule 4-9.13. For further information, please contact the District 1124 Regal Row, Austin Texas 78748. (512) 282-8441, bseacd@bseacd.org. You may also contact the applicant, Gragg Tract, LP at (512) 481-0404. 9/4/2018

Board Discussions and Possible Actions

b. Discussion and possible action related to the approval of the amended and restated water pipeline easement from the District to the Alliance Regional Water Authority - formerly the Hays Caldwell Public Utility Agency.

AMENDED AND RESTATED WATER LINE EASEMENT

STATE OF TEXAS §
COUNTY OF HAYS §

EFFECTIVE DATE: September ____, 2018

EFFECTIVE DATE of ORIGINAL WATER LINE EASEMENT: May 25, 2017

THIS AMENDED AND RESTATED WATER LINE EASEMENT (the "Amended and Restated Easement")) is made as of the Effective Date above by and between Barton Springs-Edwards Aquifer Conservation District, a groundwater conservation district and political subdivision of the state created by an act of the 70th Texas Legislature and subject to various requirements of State Law governing groundwater conservation districts, ("GRANTOR") having an address of 1124 Regal Row, Austin, Texas 78748, Attn: Alicia Reinmund-Martinez and Alliance Regional Water Authority, a regional water authority created by an act of the 85th Texas Legislature, codified as Chapter 11010, Texas Special District Local Laws Code (the "Alliance Water Act") ("GRANTEE"), having an address of 630 E. Hopkins, San Marcos, Texas 78666.

RECITALS:

- A. GRANTOR and Hays Caldwell Public Utility Agency entered into that certain Water Line Easement, dated May 25, 2017, recorded as Instrument Number 17018011in the Official Public Records of Hays County, Texas (the "ORIGINAL WATER LINE EASEMENT").
- B. The Alliance Water Act converted the Hays Caldwell Public Utility Agency into the GRANTEE, and provided for the GRANTEE to assume all assets, liabilities, obligations and contracts of Hays Caldwell Public Utility Agency.
- C. GRANTOR and GRANTEE desire to amend and restate, but not extinguish, the ORIGINAL WATER LINE EASEMENT as set forth herein and further desire that this AMENDED AND RESTATED EASEMENT shall relate back to the EFFECTIVE DATE of ORIGINAL WATER LINE EASEMENT above and, except as amended hereby, shall continue to remain in full force in effect.
- D. GRANTOR and GRANTEE agree to enter into this AMENDED AND RESTATED EASEMENT to grant a perpetual easement over the property (the "EASEMENT PROPERTY") described as follows:

TRACT 1: The 2.2613 acre (98,504 square feet) tract of land, more or less, out of the M. M. McCarver Survey, Abstract No. 10 in Hays County, Texas, being out of that called 38.624 acre tract conveyed to Barton Springs/Edwards Aquifer Conservation District in that certain Special Warranty Deed recorded in Volume 1336, Page 685 of the Official Public Records of Hays County, Texas. Said 2.2613 acre tract being more particularly described by metes and bounds in **Exhibit "A,"** attached hereto and made a part hereof for all purposes.

TRACT 2: The 0.2351 acre (10,242 square feet) tract of land, more or less, out of the M. M. McCarver Survey, Abstract No. 10 in Hays County, Texas, being out of that called 38.624 acre tract conveyed to Barton Springs/Edwards Aquifer Conservation District in that certain Special Warranty Deed recorded in Volume 1336, Page 685 of the Official Public Records of Hays County, Texas. Said 0.2351 acre tract being more particularly described by metes and bounds in **Exhibit "A,"** attached hereto and made a part hereof for all purposes.

E. GRANTEE agrees that it shall use the EASEMENT PROPERTY for a water line main which shall include the appurtenances and above ground improvements as shown generally on the attached Exhibit "B" (the "PROJECT").

AGREEMENTS:

NOW, THEREFORE, in consideration of Ten Dollars (\$10.00) and other good and valuable consideration, as described herein, the receipt and sufficient of which is hereby acknowledged, GRANTOR and GRANTEE agree as follows:

GRANTOR, for the above consideration, hereby grants, sells, and conveys to GRANTEE, its successors and assigns, a perpetual water line easement upon, under and across the EASEMENT PROPERTY, together with all and singular the rights and appurtenances thereto in anywise belonging, to have and to hold to GRANTEE and GRANTEE's successors and assigns against every person whomsoever claiming or to claim the same or any part thereof if the claim is by, through or under GRANTOR but not otherwise. The easement shall be used for the purposes of excavating for, placing, laying, constructing, installing, operating, maintaining, replacing, relocating, upgrading, removing, and repairing of water lines, water transmission mains and related appurtenances, or making connections thereto upon, under and across the property of GRANTOR. GRANTEE shall have the right of ingress and egress at all times upon and across the EASEMENT PROPERTY for the above stated purposes. In the event immediate access to the EASEMENT PROPERTY is not reasonably available over the EASEMENT PROPERTY, and only in that event, then GRANTEE shall have the right of ingress and egress over existing roads across the adjacent property of GRANTOR for the purpose of obtaining such access. GRANTOR may place a permanent structure in or on the EASEMENT PROPERTY only with the written approval of GRANTEE and such approval will not be unreasonably withheld. GRANTOR's existing road across the EASEMENT PROPERTY and continued access, use, maintenance and any improvements to the existing road are acceptable to the GRANTEE. GRANTEE will not place any above ground appurtenances or improvements on the EASEMENT PROPERTY within GRANTOR's existing road. GRANTOR may convey other easement rights in all or a portion of the EASEMENT PROPERTY to a third

party only with the written approval of GRANTEE and such approval will not be unreasonably withheld.

In addition, **GRANTOR** hereby grants and conveys a non-exclusive temporary construction easement to **GRANTEE** as shown on **Exhibit** "A." **GRANTEE** shall use the temporary construction easement herein granted for any and all purposes incident to effectuating the Project, including but not limited to construction staging, equipment storage and access to and from the **EASEMENT PROPERTY**, and shall not cross any other adjoining property of **GRANTOR** without the prior written consent of **GRANTOR**. The duration of said temporary construction easement shall commence upon execution of this document and will terminate and be of no further force or effect upon the earlier of (1) completion of the **PROJECT** as evidenced by the project final acceptance by **GRANTEE**, or (2) April 30, 2020. If requested by **GRANTOR**, **GRANTEE** shall execute and file in the Official Records of Hays County, Texas a written termination of the temporary construction easement.

Except for damage to GRANTOR's existing road as addressed below, upon completion of the construction of the PROJECT or any subsequent construction, maintenance or repair activity within the EASEMENT PROPERTY, GRANTEE shall promptly repair any damage to the property of GRANTOR which may have occurred during the period of construction, maintenance or repair, to equal or better than existing condition, and shall fill all trenches, remove all rock, construction spoils and construction debris, replace any fencing, re-vegetate the disturbed areas with a mix of native seed, and restore the surface of the EASEMENT PROPERTY to its condition prior to commencement of such construction, maintenance, removal, or repair to the extent reasonably feasible. All construction spoils shall be removed from the property of GRANTOR, and no fill or spoils or other construction debris will be dumped, spread or otherwise left deposited upon any of the GRANTOR's property. Any damage to GRANTOR's existing road caused by GRANTEE will be repaired as provided above before the completion of the construction of the PROJECT and within 72 hours of notification by the GRANTOR.

As partial consideration for the grant of the easement described herein, **GRANTEE** agrees to make the following improvements on the adjacent property of **GRANTOR**:

- 1. Move GRANTOR'S existing entry gate and fencing so that it is recessed away from Cole Springs Road by approximately 35 feet and use GRANTOR's existing gate plus some additional fencing to be supplied by GRANTEE.
- 2. Install an entry gate at the southeastern corner of the EASEMENT PROPERTY where the GRANTEE's water main line enters the property.
- 3. Construct a concrete driveway at the southeastern corner of the EASEMENT PROPERTY where the EASEMENT PROPERTY is accessed from FM 2770. The concrete driveway will be constructed in accordance with Exhibit "C" and in a manner that will eliminate erosion on the downslope edge of the concrete where it meets the existing road materials. GRANTEE will re-vegetate all disturbed areas associated with the driveway with a mix of native seed.

This AMENDED AND RESTATED EASEMENT contains the entire agreement between the parties relating to the rights granted and the obligation assumed. Any representation or modification concerning this AMENDED AND RESTATED EASEMENT shall be of no force and effect unless it is in writing, signed by party to be charged. This AMENDED AND RESTATED EASEMENT shall bind and inure to the benefits of the parties, their heirs, legal representatives, successors and assigns, and may not be assigned without the prior written consent of GRANTOR, its successors or assigns.

Any use of the EASEMENT PROPERTY, including but not limited to the construction, installation, repair, maintenance and/or use of the PROJECT, shall be in accordance with all state and federal laws, rules and regulations applicable to the EASEMENT PROPERTY and/or the PROJECT.

The invalidation of any one of the covenants or agreements contained in this AMENDED AND RESTATED EASEMENT by law, judgment or court order shall in no way affect any other provision which shall remain in full force and effect.

This AMENDED AND RESTATED EASEMENT shall be construed in accordance with the laws of the State of Texas and venue for any action brought in connection with this AMENDED AND RESTATED EASEMENT shall be brought in Hays County, Texas.

It is not a waiver of or consent to default if the non-defaulting party fails to declare immediately a default or delays in taking any action. Pursuit of any remedies set forth in this **AMENDED AND RESTATED EASEMENT** does not preclude pursuit of other remedies provided herein or as provided by law.

Any notice required or permitted under this **AMENDED AND RESTATED EASEMENT** must be in writing and delivered to the address(es) contained in this **AMENDED AND RESTATED EASEMENT**.

TO HAVE AND TO HOLD the above-described easement, together with all and singular the rights and appurtenances thereto in anywise belonging unto GRANTEE, and GRANTEE's successors and assigns forever; and GRANTOR does hereby bind itself, its heirs, successors and assigns to WARRANT AND FOREVER DEFEND all and singular the easement unto GRANTEE, its successor and assigns, against every person whomsoever claiming or to claim the same or any part thereof if the claim is by, through or under Grantor but not otherwise.

Appendix Drought Management and Enforcement Process

1.0 Drought Enforcement Strategy

The District's approach to drought management described here flows from and is consistent with District Rules 3-7.8 and 3-8. It describes the appropriate implementation mechanisms, public awareness efforts, aquifer and drought monitoring, and permittee performance monitoring and assessment to be used during drought. Compliance and enforcement efforts specified below elaborate District Rule 3-8 and center on assessment of permittee performance on a monthly basis to identify the various levels of non-compliance with mandatory pumpage reductions. This monthly assessment will focus the District's early efforts on permittees with the more egregious levels of over-pumpage, on the basis of both the percentage of pumpage over their monthly pumpage limits and the volumes of their permitted pumpage.

2.0 Implementation Mechanisms

2.1 Drought Declaration Notices

The District will declare the commencement of drought by sending written notice to all District permittees when specified aquifer conditions are met in accordance with the approved District drought trigger methodology and after the Board has approved the declaration. The staff will assess the continuation of and stage of an indicated drought continuously, and notify all permittees when a more or less severe drought stage is declared and when the drought no longer exists

2.2 Public Awareness

Once drought is officially declared by the District, the District will implement measures to provide public awareness including but not limited to:

- Web site updates on aquifer conditions and permittee pumpage performance
- Press releases and guest columns in the local newspapers
- · Recurring articles and columns in District newsletter
- Drought and aquifer condition updates provided via e-newsletter to permittees
- Outreach and education by District educators.

2.3 Monthly Compliance Evaluations

• Monthly evaluations of permittee performance and compliance with monthly drought limits will begin on the latest date that all meters readings are required to be submitted each month (the 5th of each month). Staff will identify permittees who have failed to report meter readings by the monthly reporting deadline while in District-declared drought. District will notify all those who have not reported that the District will obtain the meter readings at a fee of \$50 to the permittee. District staff will follow up with meter readings for all delinquent permittees to ensure necessary readings are available to assess drought compliance.

- Should a more or less severe drought stage be declared in the middle of a particular month, the District will evaluate and measure compliance with the less stringent drought stage requirements for that month that the status change occurred. Compliance with the measures of the newly declared stage will be required in the following month.
- Staff will generate a list of non-compliant permittees based on permitted volume and percentage over-pumped. Non-compliance will be categorized in tiers in accordance with the following criteria:

Perm	itted Pumpage (gallons/year)	% Pun	npage over Monthly Limits
Tier 1:	< 12,000,000	Level A:	< 25%
Tier 2:	≥ 12,000,000 and < 120,000,000	Level B:	≥ 25% and 100%
Tier 3:	≥ 120,000,000	Level C:	≥ 100%

- Staff will send notices of overpumpage to <u>all</u> non-compliant permittees to notify them of their overpumpage and to inform them of their level of non-compliance. This notice will also include the amount of a drought management fee if a fee is assessed without an equivalent credit.
- Staff will identify and red flag suspect permittee meter readings, on the basis of previous readings, and conduct follow-up meter reading verifications.
- Staff will monitor pumping trends of those permittees that repeatedly over-pump monthly limits while in Drought and take action based on Enforcement Procedures outlined below.
- Staff will evaluate compliance trends of all other permittees to identify efforts to comply or escalating overpumpage.
- Staff will report and update monthly, all non-performing permittees after the third consecutive enforceable month of District declared drought, by posting a list of those permittees not meeting their monthly pumpage limits on the District website and at the District office for public review.

2.4 Imposition of the Drought Management Regulatory Fee for Non-compliance

In accordance with District Rule 3-7.9, the District will impose a drought management fee to all individual permittees permitted for more than 2,000,000 gallons annually (excluding all permittees under general permits) starting after two full months of District declared Alarm or Critical Stage Drought. A credit of the fee will be applied for each month that an individual permittee that does not exceed the monthly pumpage limits as specified in the prevailing UDCP by more than five (5%). The appropriate fees are determined based on the outside diameter of the production zone casing of the permitted well or an average of the casing size of all wells in an aggregate system. The fees are as follows:

- ≤ 5" outside diameter = \$100/month
- > 5" or ≤ 10" outside diameter = \$250/month
- > 10" outside diameter = \$500/month

2.5 Determination of Occurrence of Non-compliance

Determinations of an occurrence of substantial non-compliance will be made based on 1) repeated events of non-compliance, 2) specific causes of overpumpage, and 3) the permittee's response to the reported overpumpage. In determining an occurrence, the District will take into consideration the permittee's demonstrated efforts to achieve pumpage reductions and any documented trends in prior water use reductions.

3.0 Timelines and Phasing of Determinations

Initial Month of a Drought Stage: No enforcement will be initiated for non-compliance in the initial month of Alarm Stage Drought if the timing of the declaration does not allow for a full month (after notice has been provided to the permittees) to begin assessing compliance with monthly limits. Overpumpage notices will be sent to all permittees who over-pumped their monthly pumpage limits to inform them of the on-going pumpage assessment being conducted by the District during drought and to notify them of the District's authority to enforce against non-compliance. For the initial month of Critical Stage Drought, the permittees will only be subject to the conditions of the Alarm Stage Drought until such time that a full month is available to assess compliance.

- **1-3 Months:** Enforcement efforts will focus initially on the more egregious and sustained non-compliance by the large volume permittees. During the first three consecutive enforceable months of District declared drought, monthly assessment of overpumpage violations will focus on *Tier 3* permittees with *Level B/C* non-compliance. As a practical matter, the initial assessment and enforcement activities during this period will focus on *Tier 3* permittees with */Level C* non-compliance plus those who are irrigators.
- **4-6 Months:** After the third consecutive enforceable month of District declared drought, monthly assessment of non-compliance will be expanded to include *Tier 2* permittees. Evaluation of compliance with Critical Stage Drought requirements will be begin after the first full enforceable month and will focus on *Tier 2* and *Tier 3* permittees with *Level B/C* non-compliance.

After 6 Months: After the first six (6) consecutive enforceable months of District declared drought, monthly assessment of non-compliance will continue by the same criteria for *Tier 2* and *Tier 3* permittees and will be expanded to include *Tier 1* permittees. Enforcement efforts for *Tier 1* permittees permitted for more than 2,000,000 gallons annually will be reserved for only those occurrences that are egregious and/or recurrent in nature. This will be determined when a *Tier 1* permittee reports six (6) or more months of level B or greater overpumpage or when the monthly volume overpumped equals a volume that would trigger an enforcement action for a *Tier 2* permittee. Enforcement efforts for *Tier 1* permittees permitted for 2,000,000 gallons or less will generally be reserved only for non-compliance that warrants enforcement as determined by the Board.

4.0 Drought Enforcement Procedures

Levels of non-compliance will be assessed with actions taken in accordance with the Districts Enforcement Plan and Procedures and the following enforcement protocol for those permittees with consistent or increasing levels of non-compliance.

1st Occurrence: For the initial occurrence of non-compliance, a meeting or teleconference will be arranged with the permittee representative and the District GM and staff to discuss the particular causes of the non-compliance. The discussion will focus on compliance with the measures of the UDCP and identifying causes of excessive water use/loss or other possible relevant causes for overpumpage. Specific commitments and timelines to achieve pumpage reductions will be requested and documented.

2nd Occurrence: For those permittees with a first occurrence of non-compliance and recurrent months of reported non-compliance, staff may refer the case to the Board with a recommendation to issue a NOAV. Further enforcement efforts will proceed in accordance with the District *Enforcement Procedures* and the *Penalty Assessment Guidelines*.

For those permittees with a first violation who continue to have recurrent months of reported non-compliance but with some improvement, a meeting will be arranged with the permittee representatives, GM and staff, and the appropriate District Director at the District office. Discussion will focus on the implementation of the documented measures, the success or failure of those specific measures, and the commitments to achieve pumpage reductions resulting from the first violation discussions. More detailed analysis of causes for continued non-compliance will be conducted to result in more specific and binding measures for committed pumpage reductions by the permittee.

3rd Occurrence:

For permittees with a second occurrence who continue to have multiple months of reported non-compliance, the GM may refer the case to the Board with a recommendation to issue an NOAV. Further enforcement efforts will proceed in accordance with the District Enforcement Procedures and the Penalty Assessment Guidelines.

If a permittee is non-responsive to <u>any</u> of the bulleted elements of these enforcement procedures, the GM may recommend to Board that either an NOAV be issued, a Show Cause Hearing be conducted, or an enforcement action be pursued on the violation immediately, whichever is more likely to elicit a constructive response.

Item 5

Board Discussions and Possible Actions

d. Discussion related to assessment of progress made towards achievement of the District Goals set for FY 2018 and identification of possible District goals for FY 2019.

FY 2018 District Goals Adopted October 12, 2017

Staff Progress Report September 7, 2018

The following goals were adopted by the Board to guide the District's efforts for Fiscal Year 2018. Each Goal below includes a narrative summary of District activities completed through the fiscal year to demonstrate enough progress toward achievement of a staff assessment of whether each goal was achieved or not.

1. Continue to make progress towards ongoing initiatives including: a) preserving and protecting the water quality of recharge to the Edwards and Trinity Aquifers through advocacy for sound wastewater and stormwater management practices, and b) research to progress knowledge of innovative water supply strategies such as desalination, aquifer storage and recovery, and recharge enhancement.

Lead Team: All Teams

This goal has been achieved.

The following summarizes the work completed in FY 2018 that accomplishes this goal.

a) Advocacy for sound wastewater and stormwater management practices.

Dripping Springs TPDES Permit Application. The staff and the appointed Board committee (Blayne Stansberry and Mary Stone) continued to be active in FY 2018 advocating for permit conditions that are most protective of water quality in Onion Creek which recharges the Trinity and the Edwards Aquifers. Notable activity included:

- Prepared jointly-submitted (BSEACD and HTGCD) comments on the draft permit submitted to TCEQ on November 10, 2017.
- Contributed legal support to the development of draft settlement terms for discussion purposes with other potential protestants and the applicant.
- Participated in numerous meetings with protestants and the applicant to discuss potential settlement terms.

The District requested a contested case and was granted party status after the SOAH preliminary hearing on May 21, 2018. The District, along with multiple other parties, reached a settlement agreement with Dripping Springs. Therefore, the District filed a motion to withdraw as a party to the contested case. Furthermore, per the settlement agreement, Dripping Springs requested to TCEQ that the settlement agreement be incorporated in the TPDES permit. TCEQ amended the permit to include certain components of the agreement.

WPAP Review. Staff reviews and provide comments, where applicable, for Water Pollution Abatement Plans (WPAPs) or other environmental site assessments associated with any permits or authorizations submitted to the TCEQ, COA, small cities, counties, or other political jurisdictions to mitigate potential degradation of the District's groundwater resources. Staff reviews plans to ensure

that identified wells are properly plugged or permitted and that sensitive geologic features are adequately protected or closed.

SH 45 Southwest (SH 45), MoPac Extension, and the District Consent Decree. Pursuant to the District's Consent Decree relating to the SH 45 and MoPac projects, the District staff and the District's engineering consultant, Tom Hegemier, and inspection consultant, Dave Fowler, continued to be directly involved in oversight of construction activities to ensure sedimentation from stormwater runoff that may affect recharge water quality was limited.

The District staff and consultant participated in seven site inspections on SH 45 and four site inspections on the MoPac extension throughout FY 2018 to assess key construction milestones and the impact of significant rainfall events. The inspection findings were documented in inspection reports that were provided to key project personnel with recommendations and suggestions related to project activities.

The staff's area of focus has been primarily related to evaluations of significant geologic features and the assessment of adequate stormwater control designs onsite. Staff continues to provide input and comments on any changed plans related to project activities. Staff intends to continue these efforts throughout the duration of the construction which will carry over into FY 2019.

- b) Research to progress knowledge of innovative water supply strategies such as desalination, aquifer storage and recovery.
- District staff and the Carollo team of consultants completed the BSEACD Desalination/ASR
 Feasibility Assessment Project Report in March 2018. The Carollo team consisted of Carollo
 Engineers, Inc., ASR Systems Inc., and NewGen Strategies and Solutions. The report was
 submitted to the TWDB as the final deliverable to the TWDB grant. This study estimated costs for
 desalination and ASR facilities on the Texas Disposal Systems property.
- District staff and consultant geochemist finalized a report on the hydrogeology of the saline Edwards. Data collected in the multiport well at the Texas Disposal System facility allowed for the detailed hydrogeologic characterization of the various units. This report concluded that desalination and ASR were hydraulically feasible for the saline Edwards Aquifer.
- District staff drafted technical memorandums on the results of the first two phases of the Ruby Ranch Water Supply Corporation's ASR study which uses Edwards water to inject into the Middle Trinity Aquifer for storage. From October through May, District staff participated in the injection portion of the third phase of this ASR study by collecting water quality and quantity data. The third phase of extraction began in July 2018. A separate report on the project, including data analysis, will be submitted to TCEQ in fall 2018.
- 2. Coordinate District activity to support effective regional groundwater management strategies by improving GCD coordination through the GMA planning framework and supporting other GCD's management of aquifers shared with the District.

Lead Team: General Management Team

GMA 9

District staff attended one GMA 9 meeting in FY 2018 as the designated representative for the District. The meeting was in Bulverde (New Comal County GCD hosted) on January 29, 2018. In that meeting, staff presented the District's Management Plan. Other efforts include:

- Staff worked on a master spreadsheet that summarizes the rules of all the GCDs in GMA 9.
- Staff provided an update to an evaluation of the DFC in GMA 9. A technical memorandum will be presented at the next GMA 9 meeting.

GMA 10

District staff attended six GMA 10 meetings throughout FY 2018. Like GMA 9 efforts, District staff along with consultant, Kirk Holland, participated in a GMA 10 Joint Planning Committee to establish a rule comparison framework. The committee created a detailed rule comparison spreadsheet and prepared a narrative describing general areas of similarities and differences in the rules of member GCDs. The narrative and spreadsheet data are intended to be used to inform GCD boards of other potential regulatory approaches that might be feasible, as part of regional collaboration in the joint planning process.

Additionally, staff spoke at the March 26 meeting in San Antonio on an approach to DFC monitoring using GMA 9 as an example.

GCD Meet and Share Discussion

The District coordinated a roundtable discussion with other GCDs in the Central Texas area to discuss key permitting related topics such as large-scale permit requests, mitigation, DFC monitoring, permitting fees, special conditions, and aquifer testing. The discussion served to provide the group with new ideas and lessons learned from other District's experiences.

3. Continue effort of implementing procedures that make office operations more efficient, effective, and more transparent including communications and information dissemination, file management, and budget presentation/reporting.

Lead Team: Administrative Team

This goal has been achieved.

The following projects were completed or substantially advanced during FY 2018 to improve office operations pursuant to this goal:

- A budget template for a Budget Summary Version was created, that includes two pie charts showing total income forecasted and total expenses forecasted for the upcoming fiscal year. Also, additional backup documentation is now being included with the preliminary and the proposed budget versions that are presented to the Board for approval.
- The W-9 vendor files were organized and updated, culling outdated forms and auditing active contract vendors for receipt of the W-9 form; scanning active forms into Quickbooks, and updating Quickbooks for quick access to these scanned forms in the Vendor Center of Quickbooks.
- The District stakeholder lists (holiday invitations, anniversary list, Christmas card list, etc.) have been compiled into an email list with updated contacts, and with the capability to easily add to, update, and distribute via a contact organization application (e.g. icontact or evite.)
- A manual was developed with detailed instructions on managing certain tasks in the absence of the Senior Administrative Specialist, including but not limited to copier maintenance and repair, supplies procurement, postage replenishment, etc.

- A method was developed for calculating CPI to be assessed to the City of Austin Water Use Fee
 once the fee reaches its statutory cap, through a consultant. This method would still to be vetted
 from the City of Austin and agreed upon before its application, but that time has not yet occurred.
- 4. Conduct aquifer science studies that will help evaluate unreasonable impacts to the Trinity Aquifers, increase monitoring capabilities of the Trinity Aquifers, and consider alternative drought triggers for the Trinity Aquifers.

Lead Team: Aquifer Science Team

This goal has been achieved.

Since passage of House Bill 3405, studies have been conducted of the Trinity Aquifers to support policy development and management of the Trinity Aquifers. The following tasks have been completed to achieve the requirements of Goal 4:

- A methodology was developed to determine the potential for unreasonable impacts due to pumping
 of the Trinity Aquifers. Aquifer-test data from the Needmore and EP sites were used to determine
 aquifer parameters from which drawdown predictions for various pumping scenarios could be
 made. For the EP site, this led to the determination of a high potential for unreasonable impacts,
 which were summarized in the General Manager's Position Statement.
- A system of monitor wells has been established in the shared territories. This consists primarily
 of domestic wells for which the well owners have allowed access to District staff to monitor water
 levels over time. Monitoring has focused on the EP and Needmore areas, and some neighborhoods
 to the west of San Marcos for which there had not been monitoring previously. Monitoring is also
 being conducted in a multiport monitor well in the Rolling Oaks subdivision that was installed by
 the District.
- With increased pumping from the Trinity Aquifers, it was necessary to evaluate the sensitivity of these aquifers to drought conditions and to determine if the current drought monitoring of the Edwards Aquifer was applicable to the Trinity Aquifers. A technical memo was prepared that concluded that climatic conditions that cause drought issues for the Edwards Aquifer bring about similar effects in the Trinity Aquifers. Therefore, drought trigger levels set for Barton Springs and the Lovelady monitor well also apply to the Trinity Aquifers.
- 5. Prepare educational content and develop programming to raise awareness about the interconnectedness of land stewardship, water quality, and endangered species.

Lead Team: Education & Outreach Team

This goal has been achieved.

The Education and Outreach team has focused on increasing social media presence, reorganizing and expanding website content, visiting with well owners, and developing an educational game with new technology to highlight the connectivity of land management decisions on water quality.

- The team developed and ran social media posts based on ten of the City of Austin and Texas Agrilife's Grow Green Guides that discuss the least toxic methods to deal with common pests. Posts related to safe treatment of fire ants, mosquitos, and poison ivy were highly successful, each getting between 1,000-1,500 impressions. Home owners were encouraged to protect the quality of runoff from their land by reducing the use of harmful chemicals.
- The Water Conservation section of the District website was expanded to include water quality protection information. Sections on pest control, native and adaptive plants, rain gardens and waste control were added.
- Articles in eight eNews bulletins updated the public, well owners, and stakeholders on aquifer news such as aquifer status, habitat conservation plan progress, water quality protection efforts, and District programs. ENews bulletins are sent to 2,574 subscribers.
- During this year's Well Water Checkup and Neighborhood Site Visits, staff screened well water for nitrate and bacteria (common contaminants that indicate a surface connection) and spoke with well owners about the importance of good septic system maintenance, limited use of harmful pesticides and herbicides, and potential for groundwater-surface water connections in karst systems.
- Staff are finalizing details on the educational augmented reality game called Creek Quest. The
 game uses several modes of play to engage a wide variety of audiences in diverse settings. Cards
 represent the District's two endangered salamanders, six key environmental indicator species, and
 three habitats. Each animal card shows the corresponding habitat, average size, and pollution
 sensitivity level. The augmented reality application can be used to visualize the animals'
 movement and habitat, link to additional information, and verify life cycle pairs (larvae and adult).
- 6. Improve and enhance the organization, accessibility, and dissemination of District data and groundwater management information through: a) development of an integrated database and reporting system, and b) an updated Annual Report format that is simple and informative and satisfies the reporting requirements for the prospective Habitat Conservation Plan and the revised Management Plan.

Lead Team: Regulatory Compliance Team

Substantial progress has been made on this goal.

- Staff has successfully provided project management oversight for a contract for a database management and reporting system. This final data management system will aid staff in data analysis efforts, data input, permit management, production management, HCP reporting, and annual reporting. To aid in the progress of this project deliverable, staff has maintained regular biweekly meetings with the contractor, and developed guidance mockups and checklists for the contractor. There are regularly scheduled updates and budget updates to ensure the project is moving forward in a timely fashion. The database will be completed in Fiscal Year 2019.
- Staff will be working with the General Manager and possibly an outside contractor to support the efforts to design and enhance the format of the annual report. In this immediate year (Fall 2018), a template may be designed in lieu of an actual final report. This is due to the timing and requirements of the Incidental Take Permit from USFWS.

Item 5

Board Discussions and Possible Actions

e. Discussion and possible action related to scheduling of hearing and procedural matters relating to Needmore Water LLC permit application.

Item 6

Adjournment
