RE: Amendment to Test Well Permit Authorization for Electro Purification.

Dear Permittee:

Your consultant, Kaveh Khorzad, P.G. (Wet Rock Groundwater Service, LLC), has indicated in an email to the District dated December 15, 2016 a need for additional authorized production to complete the aquifer testing approved for the above-reference test wells. Specifically, the request referenced a need to conduct a retest on a test well with a more representative temporary completion. It is important that the aquifer test is conducted on test wells that are representative of permanent completion such that the alternative completion design is of adequate performance during the testing and the final target production zone was adequately isolated during the testing. **Therefore, based on water use estimates provided, the Test Well Permit Authorization has been amended to authorize temporary production of an amount not to exceed 17,000,000 gallons in aggregate.** All other conditions of the original test well authorization apply.

If you have any further questions, please feel free to contact the Regulatory Program Staff by phone at (512)282-8441 or contact Vanessa Escobar at vescobar@bseacd.org or Kendall Bell-Enders kbellenders@bseacd.org

Sincerely,

John Dupnik, P.G.
